***Election / Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, and 40-48, drawn to a method and device for producing a reducing gas, classified in class 48, subclass 197R***
- II. Claims 19-39, and 49-60, drawn to a device for reducing nitrogen oxide (NO<sub>x</sub>) content in oxygen-containing emissions of a lean burn engine, classified in class 60, subclass 286.***
- II. Claims 62-65, drawn to a catalyst composition, classified in class 422, subclass 177.***

Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01. In the instant case, the different inventions have different modes of operation. Specifically, claims 19-39 require a second catalytic zone downstream from said first catalytic zone and comprising a catalyst capable of reducing NO<sub>x</sub> to N<sub>2</sub> in the presence of a reducing gas.... ; and claims 62-65 require catalyst composition for producing H<sub>2</sub> and CO ....

Because these inventions are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
